## PROFESSIONAL SUMMARY

ERP-focused software engineer combining Odoo (v15–v19) and ERPNext development, corporate training, full-stack application engineering, and hands-on technical team leadership. Leads ERP technical teams and project delivery across multiple business sectors while personally building custom modules, integrations, reports, and OWL-based interfaces. Also designs and develops custom full-stack web applications, including a learning management platform and a training-company application. Translates business requirements into maintainable, PostgreSQL-backed software solutions.

## TECHNICAL SKILLS

**ERP Platforms:** Odoo Community v15–v19 (ORM, model inheritance, computed fields, constraints, QWeb reports, OWL components); ERPNext and Frappe Framework

**Languages:** Python, JavaScript, SQL, XML, HTML5/CSS3

**Frontend:** OWL, React.js, Next.js

**Backend:** Node.js, Express, NestJS, RESTful API development, Microservice architecture

**Databases:** PostgreSQL, MongoDB

**APIs & Integrations:** XML-RPC, JSON-RPC, REST, Postman

**DevOps & Tools:** Git, GitHub, Docker, Kubernetes

**Delivery:** Agile, project planning, code review, requirements analysis, corporate and end-user training, Business Intelligence

## PROFESSIONAL EXPERIENCE

### ERP Technical Team Leader & Project Manager

*BelTech Solutions (Hybrid)* | *08/2026 – Present*

- Lead ERP technical teams and coordinate development, task delegation, and delivery across ERP projects in construction, education, travel, and real estate, among other sectors.
- Plan, organize, and follow up on project implementation, from requirements gathering through customization, integration, and business process rollout.
- Work with stakeholders to translate business requirements into practical technical solutions; support technical decisions, code quality, and troubleshooting.
- Deliver corporate trainings for client organizations, including an import/export company, in addition to implementation work.

**Odoo ERP Technical & Functional Consultant | Team Leader | Full-Stack Developer**

*SOEZ Technology, Addis Ababa, Ethiopia | 02/2025 – Present*

- Architected Odoo 18 Community solutions across the full development lifecycle; Agile workflows reduced deployment cycles by 20%.
- Built custom Odoo modules with ORM (model inheritance, computed fields, constraints), automating manual workflows and reducing processing time by 30%.
- Developed QWeb reports and OWL-based dashboards for 50+ users, reducing reporting time from hours to minutes.
- Optimized PostgreSQL performance for high-concurrency internal operations.
- Design, architect, and develop a full-stack application for a coffee training company using the MERN stack (MongoDB, Express, React, Node.js).
- Contribute to a large-scale online learning management system for a training company, developing both back-end and front-end functionality.

**Software Engineer (Odoo)**

*ALTAcomputec, Addis Ababa, Ethiopia | 12/2025 – 02/2026*

- Led a development team customizing Odoo ERP with custom fields, workflows, and business logic.
- Wrote Python data-migration scripts preserving integrity of historical financial data during ERP transition.
- Integrated third-party systems via XML-RPC/JSON-RPC for data synchronization between Odoo and external hardware.
- Conducted code reviews and enforced Odoo best practices (PEP8, module structure), reducing post-launch bug reports by 15%.
- Translated multi-warehouse requirements into technical specifications for a system-wide Odoo deployment.

**Odoo Technical Developer (Intern)**

*GraceERP Consultancy, Addis Ababa, Ethiopia | 09/2025 – 12/2025*

- Worked across Odoo versions 15–19, contributing to early testing and module compatibility of new framework features.
- Developed and deployed custom ERP solutions for clients in diverse industries.
- Built custom models and inherited views in Python and XML to meet industry compliance and reporting requirements.

**Full-Stack Developer**

*Debo Engineering Corporate, Addis Ababa, Ethiopia | 10/2024 – 06/2025*

- Built a custom web platform end to end: UI/UX wireframing, database schema design, and cloud deployment.
- Developed a responsive React front end and a Node.js/Express/MongoDB back end.
- Gathered requirements with stakeholders and cross-functional teams to deliver business-focused solutions.

**Web Development Intern**

*Rago Software Solution, Addis Ababa, Ethiopia* | *07/2024 – 10/2024*

- Developed a dynamic product showcase website using Next.js and Payload CMS.
- Improved responsive layouts and load-time performance; built modular frontend components.
- Collaborated in Git-based Agile team workflows.

## EDUCATION

**B.Sc. in Computer Science** | Jimma University, Jimma, Ethiopia | 2022 – 2025

## COURSES & CERTIFICATIONS

- Introduction to Software Engineering (IBM, Coursera)
- Getting Started with Git and GitHub (IBM, Coursera)
- Introduction to Cloud Computing (IBM, Coursera)
